

## Thermage® Skin Tightening Procedures

### Outline Enhancement With 3D Skin Tightening

### Natural Renewal Process of Collagen

As we age, collagen in our skin breaks down and causes the formation of wrinkles, sagging and loose skin. Thermage 3D Skin Tightening Procedures with the patented Mono-polar Capacitive Radiofrequency (RF) technology are designed to deliver heat safely and uniformly into the deep skin layers to kick start the natural renewal process of collagen. This results in an tightening and well-defined three-dimensional feature. Thermage 3D Skin Tightening Procedures is the only non-invasive eyelid treatment with FDA clearance.

## Tighten Skin, Reduce Wrinkles and Improve Contour

Thermage® Total Tip 3.0 heats the dermis up to 75°C, the entire skin tissue heats up evenly, and delivers as much as two times greater bulk heating volume in the skin. It stimulates the collagen uniformly and consistently, enhances the tightening and contouring effects. The results of collagen tightening include :

- A smoother and tighter skin with less sagging
- A more defined jawline and chin contour
- Softened wrinkles and fine lines around the mouth, eye, forehead and knees
- Tightened skin under chin, arms and buttocks

After the treatment, the results will continue to improve in the first 6 months and its effects can last up to 12 months according to clinical research studies. The results are subject to skin condition, age, natural aging process, lifestyle and diet. Thermage 3D Skin Tightening Procedures is a non-invasive treatment. The treatment requires no special aftercare. You usually can get back to your normal routine immediately following treatment.

### EYES TREATMENT: Reduces wrinkles, fine lines and sagging

Before Thermage

15 months post treatment

Treatment by Flor Mayoral, MD

## FACIAL TREATMENT: Reduces Wrinkles, Sagging and Redefines Contour

Before Thermage

3 Months Post Treatment

Treatment by Nelly Gauthier, M.D.

## BODY TREATMENT: Tightens Skin, Crepey and Sagging Skin

Before Thermage

6 months post treatment

Treatment by Richard Asarch, M.D.
