

**St. Teresa's Hospital**  
Oncology Centre

## WHY CHOOSE US?

We provide advanced, patient-centered cancer care focusing on comfort, speed, and accessibility.

## 01. Service Commitment

Our team has extensive experience in dosimetry and commits to completing your treatment planning and starting treatment within one week.

## Technology Development & International Awards 02.

We are dedicated to advancing and refining treatment technologies. Actively participating in international radiation dosimetry competitions, we have been recognized with multiple awards in various cancer contests. For more details, please refer to the "Radiotherapy Planning Awards" brochure.

## 03. Professional & Efficient

Surface-guided and image-guided radiation therapy techniques reproduce simulation position accurately, while computerized automated tracking and verification technology allow quick imaging localization before each treatment. With the VMAT technique, treatment duration is reduced substantially from 30 minutes to less than 10 minutes, increasing treatment efficiency and accuracy.

## 04. Tattooless Skinmark

Delivers precise treatment using the image-guided radiation therapy technique without permanent tattoos, eliminating pain, invasive piercing from tattoo marking procedure and cosmetic concerns.

## 05. Same-day Treatment

Emergency radiotherapy services are provided for patients in urgent need, allowing for same-day imaging localization, dose calculation, and commencement of treatment to ensure timely access to appropriate care.
